[CleanMyMac - 2.2.7 \[Intel Crack\]](#)

The screenshot shows the MacKeeper application window with the Memory Cleaner tool active. The interface is divided into three main sections: a sidebar on the left, a central content area, and a live support bar on the right.

- Sidebar:** Contains various system utility categories such as System Status, Human Assistance, Security, and Advanced Tools. The 'Memory...' tool is highlighted in blue, showing a usage of 314.7 MB.
- Central Content Area:** Displays the 'Memory Cleaner' tool header with a sub-header 'Simplifies memory control of your Mac.' Below this, there are tabs for 'Memory Status' and 'Advanced Options'. The main display features a large gauge showing '8.0 GB of RAM installed on your MacBook Air'. The gauge indicates that 7.7 GB is used and 314.7 MB is free. A prominent blue button at the bottom of the gauge reads 'CLEAN MEMORY QUICKLY >'. A 'What is RAM?' help link is visible in the top right of this section.
- Live Support Bar:** Located on the right, it includes 'About' and 'Help' buttons. Below, it provides a 'What is Memory Cleaner?' section with explanatory text: 'Memory Cleaner was designed to clean and optimize your Mac's RAM (random accessed memory) where all the data of current session is stored. It means that your computer stores all the apps or files you use at one place for quick access, even if you have closed them already. The overload of RAM can affect your Mac and Memory Cleaner may clean it up instantly.' A 'Show Welcome Screen' link is also present.
